

# IκBα Rabbit pAb

Catalog No.: A11397    **29 Publications**

## Basic Information

### Observed MW

36kDa

### Calculated MW

36kDa

### Category

Primary antibody

### Applications

WB, IP, ELISA

### Cross-Reactivity

Human, Mouse, Rat

## Background

This gene encodes a member of the NF-kappa-B inhibitor family, which contain multiple ankrin repeat domains. The encoded protein interacts with REL dimers to inhibit NF-kappa-B/REL complexes which are involved in inflammatory responses. The encoded protein moves between the cytoplasm and the nucleus via a nuclear localization signal and CRM1-mediated nuclear export. Mutations in this gene have been found in ectodermal dysplasia anhidrotic with T-cell immunodeficiency autosomal dominant disease.

## Recommended Dilutions

**WB**                    1:500 - 1:1000

**IP**                    1:20 - 1:50

**ELISA**                Recommended starting concentration is 1 µg/mL.  
                          Please optimize the concentration based on your specific assay requirements.

## Immunogen Information

### Gene ID

4792

### Swiss Prot

P25963

### Immunogen

Recombinant protein (or fragment). This information is considered to be commercially sensitive.

### Synonyms

IKBA; MAD-3; NFKBI; EDAID2; IκBα

## Contact

	400-999-6126

## Product Information

### Source

Rabbit

### Isotype

IgG

### Purification

Affinity purification

### Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS containing 50% glycerol, preserved with proclin300 or sodium azide (as specified on the Certificate of Analysis), pH 7.3.
