[KO Validated] Caspase-8 Rabbit mAb

Catalog No.: A19549 KO Validated Recombinant 5 Publications

Basic Information

Observed MW 57kDa

Calculated MW 55kDa

Category Primary antibody

Applications WB,ELISA

Cross-Reactivity Human

CloneNo number ARC0028

Background

This gene encodes a member of the cysteine-aspartic acid protease (caspase) family. Sequential activation of caspases plays a central role in the execution-phase of cell apoptosis. Caspases exist as inactive proenzymes composed of a prodomain, a large protease subunit, and a small protease subunit. Activation of caspases requires proteolytic processing at conserved internal aspartic residues to generate a heterodimeric enzyme consisting of the large and small subunits. This protein is involved in the programmed cell death induced by Fas and various apoptotic stimuli. The N-terminal FADD-like death effector domain of this protein suggests that it may interact with Fas-interacting protein FADD. This protein was detected in the insoluble fraction of the affected brain region from Huntington disease patients but not in those from normal controls, which implicated the role in neurodegenerative diseases. Many alternatively spliced transcript variants encoding different isoforms have been described, although not all variants have had their full-length sequences determined.

Recommended Dilutions

| WB | 1:1000 - 1:2000 |
|-------|---|
| ELISA | Recommended starting concentration is 1 µg/mL. Please optimize the concentration based on your specific assay |
| | requirements. |

Immunogen Information

Gene ID 841

Swiss Prot Q14790

Immunogen

Synthetic peptide. This information is considered to be commercially sensitive.

Synonyms

CAP4; MACH; MCH5; FLICE; ALPS2B; Casp-8; Caspase-8

Product Information

Source Rabbit

Isotype lgG

Purification Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 0.05% BSA, 50% glycerol, pH7.3.
