PE/Cyanine7 Mouse anti-Human CD19 mAb

Catalog No.: A22819

Basic Information

Observed MW Refer to figures

Calculated MW 61kDa

Category Primary antibody

Applications FC

Cross-Reactivity Human

CloneNo number AMC0541

Coniugate

PE-Cy7. Ex:565nm. Em:778nm.

Recommended Dilutions

10 µL/Test

FC

Background

cell surface protein is restricted to B cell lymphocytes. This protein is a reliable marker for pre-B cells but its expression diminishes during terminal B cell differentiation in antibody secreting plasma cells. The protein has two N-terminal extracellular Ig-like domains separated by a non-Ig-like domain, a hydrophobic transmembrane domain, and a large Cterminal cytoplasmic domain. This protein forms a complex with several membrane proteins including complement receptor type 2 (CD21) and tetraspanin (CD81) and this complex reduces the threshold for antigen-initiated B cell activation. Activation of this B-cell antigen receptor complex activates the phosphatidylinositol 3-kinase signalling pathway and the subsequent release of intracellular stores of calcium ions. This protein is a target of chimeric antigen receptor (CAR) T-cells used in the treatment of lymphoblastic leukemia. Mutations in this gene are associated with the disease common variable immunodeficiency 3 (CVID3) which results in a failure of B-cell differentiation and impaired secretion of immunoglobulins. CVID3 is characterized by hypogammaglobulinemia, an inability to mount an antibody response to antigen, and recurrent bacterial infections. Alternative splicing results in multiple transcript variants encoding distinct isoforms.

This gene encodes a member of the immunoglobulin gene superfamily. Expression of this

Immunogen Information

Gene ID 930

Swiss Prot P15391

Immunogen

Recombinant protein (or fragment). This information is considered to be commercially sensitive.

Synonyms

B4; CVID3

6 400-999-6126 cn.market@abclonal.com.cn \sim G www.abclonal.com.cn

Product Information

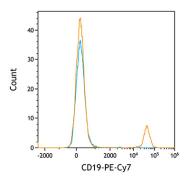

Source Mouse

Isotype lgG1

Purification Affinity purification

Storage

Store at 4°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.1% Proclin300,0.2% BSA,pH7.2.

Flow cytometry:1X10⁶ Human PBMC were surface-stained with PE-Cy7 Mouse anti-Human CD19 mAb (A22819, orange line) or isotype control mAb (blue line). Flow cytometry:1X10^6 Human PBMC were surface-stained with Isotype control mAb (left) or PE-Cy7 Mouse anti-Human CD19 mAb (A22819, right).
