Predicted to enable carbohydrate binding activity. Acts upstream of or within connective tissue replacement involved in inflammatory response wound healing. Predicted to be located in membrane. Predicted to be integral component of membrane. Predicted to be active in external side of plasma membrane. Is expressed in several structures, including cartilage; dermis; embryo mesenchyme; metencephalon part of 4th ventricle choroid plexus; and spinal cord marginal layer. Orthologous to human CLEC10A (C-type lectin domain containing 10A).

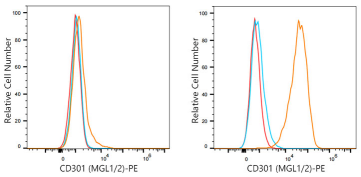
Validation Data



Flow cytometry: 1X10^6 Neuro-2a cells (negative control,left) and Raw264.7 cells (right) were surface-stained with PE Rabbit anti-Mouse CD301 (MGL1/2) mAb (A25198,2 µg/mL,orange line) or PE Rabbit IgG isotype control (A24172,5 µl/Test,blue line), followed by PE conjugated Donkey anti-rabbit pAb staining. Non-fluorescently stained cells were used as blank control (red line).
