

ABflo® 488 Rabbit anti-Mouse F4/80 mAb

Catalog No.: A28286

Basic Information

Observed MW

Calculated MW

102kDa

Category

Primary antibody

Applications

FC

Cross-Reactivity

Mouse

CloneNo number

ARC74998

Conjugate

ABflo® 488. Ex:491nm. Em:516nm.

Recommended Dilutions

FC ≤0.25 µg per million cells
in 100 µl volume

Background

F4/80, also known as EMR1 or Ly71, is a 160 kDa glycoprotein belonging to the epidermal growth factor (EGF)-transmembrane 7 (TM7) family. It is widely used as a murine macrophage marker. F4/80 is expressed on most tissue macrophages, including those in the lung, intestine, peritoneal cavity, thymus, and splenic red pulp, as well as Kupffer cells, Langerhans cells, microglia, and certain dendritic cell subsets. It is notably absent on macrophages residing in the T-cell areas of the spleen, lymph nodes, and Peyer's patches. Although the biological ligand for F4/80 has not yet been identified, this molecule has been reported to be required for the induction of CD8 T cell-mediated peripheral tolerance.

Immunogen Information

Gene ID

13733

Swiss Prot

Q61549

Immunogen

Recombinant protein (or fragment). This information is considered to be commercially sensitive.

Synonyms

Emr1; Ly71; F4/80; Gpf480; TM7LN3; DD7A5-7; EGF-TM7

Product Information

Source

Rabbit

Isotype

IgG

Purification

Affinity purification

Storage

Store at 2-8°C. Avoid freeze.

Buffer: PBS with 0.09% Sodium azide, 0.2% BSA, pH7.3.

Validation Data

Flow cytometry: 1×10^6 C57BL/6 mouse bone marrow cells were surface-stained with ABflo® 450 Rabbit anti-Mouse CD11b mAb (A26229, 5 μ l/Test) and ABflo® 488 Rabbit IgG isotype control (A22069, 5 μ l/Test, left) or ABflo® 488 Rabbit anti-Mouse F4/80 mAb (A28286, 0.25 μ g, right).
