

# Phospho-INSR-Y1150/IGF1R-Y1135 Rabbit pAb

Catalog No.: AP0044 2 Publications

### **Basic Information**

#### **Observed MW**

80kDa

### **Calculated MW**

154kDa/155kDa/156kDa

### Category

Primary antibody

### **Applications**

WB,ELISA

### **Cross-Reactivity**

Human, Mouse, Rat

# **Background**

This receptor binds insulin-like growth factor with a high affinity. It has tyrosine kinase activity. The insulin-like growth factor I receptor plays a critical role in transformation events. Cleavage of the precursor generates alpha and beta subunits. It is highly overexpressed in most malignant tissues where it functions as an anti-apoptotic agent by enhancing cell survival. Alternatively spliced transcript variants encoding distinct isoforms have been found for this gene. [provided by RefSeq, May 2014]

# **Recommended Dilutions**

**WB** 1:500 - 1:2000

**ELISA** 

Recommended starting concentration is 1 µg/mL.
Please optimize the concentration based on your specific assay requirements.

## Immunogen Information

 Gene ID
 Swiss Prot

 3643/3480
 P06213/P08069

### **Immunogen**

Synthetic peptide. This information is considered to be commercially sensitive.

### **Synonyms**

IGF1R/INSR; Phospho-INSR-Y1150/IGF1R-Y1135

### **Contact**

<u>a</u>		400-999-6126

### **Product Information**

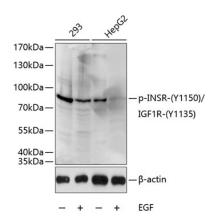

SourceIsotypePurificationRabbitIgGAffinity purification

### Storage

Store at -20  $^{\circ}\text{C}.$  Avoid freeze / thaw cycles.

Buffer: PBS with 0.05% proclin300,50% glycerol,pH7.3.

### **Validation Data**

Western blot analysis of lysates from 293 and HepG2 cells, using Phospho-INSR-Y1150/IGF1R-Y1135 Rabbit pAb (AP0044) at 1:1000 dilution. 293 cells were treated by EGF ( $25\mu g/mL$ ) for 30 minutes after serum-starvation overnight. HepG2 cells were treated by EGF (100ng/mL) for 30 minutes after serum-starvation overnight.

Secondary antibody: HRP-conjugated Goat anti-Rabbit lgG (H+L) (AS014) at 1:10000 dilution. Lysates/proteins:  $25\mu g$  per lane.

Blocking buffer: 3% BSA.
