Background

Product Information

Description
RBFOX3 Knockdown 293T Cell Line is engineered from 293T cell line with Gene-Editing technology.
Allele-1:110bp deletion in exon1
Allele-2:111bp deletion in exon1
Mammalian cells such as human, rat and mouse cells are normally diploid with two alleles. Homozygote: both alleles were knocked out, mRNA has no signal, no expression of proteins. Heterozygote: only one allele was knocked out, the mRNA transcript levels was decreased compared to wild type, and the protein expression levels was also lower than that of the wild type.

Packaging
1 vial parental cell Lysate and 1 vial knockout cell Lysate
