

Catalog No.: RP00065 **Recombinant**

Species	Gene ID	Swiss Prot
Human	941	P33681

C-His

Synonyms
B7;B7-1;B7.1;BB1;CD28LG;CD28LG1;LAB
7;CD80

Source	Purification
HEK293 cells	≥ 90 % as determined by SDS-PAGE

24.71 kDa 40-50 kDa

< 0.1 EU/μg of the protein by LAL method.

Lyophilized from a 0.22 μ m filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize freeze-thaw cycles.

The protein is a membrane receptor that is activated by the binding of CD28 or CTLA-4. The activated protein induces T-cell proliferation and cytokine production. This protein can act as a receptor for adenovirus subgroup B and may play a role in lupus neuropathy.

Recombinant Human B7-1/CD80 Protein is produced by HEK293 expression system. The target protein is expressed with sequence (Val35-Asn242) of human B7-1/CD80 (Accession #NP_005182.1) fused with a 6xHis tag at the C-terminus.

Measured by its binding ability in a functional ELISA. Immobilized Recombinant human CD80 at 2 µg/mL (100 µL/well) can bind Recombinant human CTLA-4 with a linear range of 10-50 ng/mL.

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.
After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human B7-1/CD80 Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.

Immobilized Recombinant human CD80 at 2 μ g/mL (100 μ L/well) can bind Recombinant human CTLA-4 with a linear range of 10-50 ng/mL.
