

Catalog No.: RP00168 **Recombinant**

Species	Gene ID	Swiss Prot
Human	54210	O9NP99

C-hFc&His

TREM1:CD354:TREM-1

Source	Purification
HEK293 cells	≥ 95 % as determined by SDS-PAGE

47.05 kDa 60-70 kDa

< 0.1 EU/μg of the protein by LAL method.

Lyophilized from a 0.22 μ m filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize freeze-thaw cycles.

TREM1 (triggering receptor expressed on myeloid cells) is a type I transmembrane protein with a single Ig-like domain, and is selectively expressed on blood neutrophils and a subset of monocytes. As a member of the growing family of receptors related to NK cell receptors, TREM1 activates downstream signaling events with the help of an adapter protein called DAP12. TREM1 amplifies neutrophil and monocyte-mediated inflammatory responses triggered by bacterial and fungal infections by stimulating release of pro-inflammatory chemokines and cytokines, as well as increased surface expression of cell activation markers.

Recombinant Human TREM1 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Ala21-Arg200) of human TREM1 (Accession #NP_061113.1) fused with an Fc, 6xHis tag at the C-terminus.

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human TREM-1/CD354 Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
