

# Recombinant Human TREM-1/CD354 Protein

Catalog No.: RP00168 **Recombinant**

## Sequence Information

**Species** Human    **Gene ID** 54210    **Swiss Prot** Q9NP99

### Tags

C-hFc&His

### Synonyms

TREM1;CD354;TREM-1

## Background

TREM1 (triggering receptor expressed on myeloid cells) is a type I transmembrane protein with a single Ig-like domain, and is selectively expressed on blood neutrophils and a subset of monocytes. As a member of the growing family of receptors related to NK cell receptors, TREM1 activates downstream signalling events with the help of an adapter protein called DAP12. T TREM1 amplifies neutrophil and monocyte-mediated inflammatory responses triggered by bacterial and fungal infections by stimulating release of pro-inflammatory chemokines and cytokines, as well as increased surface expression of cell activation markers.

## Basic Information

### Description

Recombinant Human TREM1 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Ala21-Arg200) of human TREM1 (Accession #NP\_061113.1) fused with an Fc, 6xHis tag at the C-terminus.

### Bio-Activity

### Shipping

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

### Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

### Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

## Product Information

### Source

HEK293 cells

### Purification

≥ 95 % as determined by SDS-PAGE.

### Calculated MW

47.05 kDa

### Observed MW

60-70 kDa

### Endotoxin

< 0.1 EU/μg of the protein by LAL method.

### Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

### Reconstitution

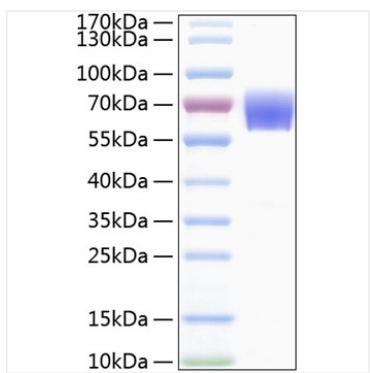

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize freeze-thaw cycles.

## Validation Data

---

Recombinant Human TREM-1/CD354 Protein  
was determined by SDS-PAGE under  
reducing conditions with Coomassie Blue.
