

# Recombinant Human SIRP-alpha/CD172a Protein

Catalog No.: RP00171 Recombinant

# **Sequence Information**

Species Gene ID Swiss Prot Human 140885 P78324

# Tags

C-hFc&His

#### **Synonyms**

BIT; CD172A; MFR; MYD-1; P84; PTPNS1; SHPS1:

SIRP;SIRPA;CD172A;MFR;MYD-1;P84;PTP NS1;SHPS1;SIRP

# **Product Information**

Source

## **Purification**

HEK293 cells

≥ 95 % as determined by SDS-PAGE;≥ 90 % as determined by HPLC.

## Calculated MW Observed MW

64.10 kDa 80-100 kDa

#### **Endotoxin**

< 0.1 EU/µg of the protein by LAL method.

#### **Formulation**

Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.Contact us for customized product form or formulation.

## Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

# **Background**

The protein is a member of the signal-regulatory-protein (SIRP) family, and also belongs to the immunoglobulin superfamily. SIRP family members are receptor-type transmembrane glycoproteins known to be involved in the negative regulation of receptor tyrosine kinase-coupled signaling processes. This protein can be phosphorylated by tyrosine kinases. The phospho-tyrosine residues of this PTP have been shown to recruit SH2 domain containing tyrosine phosphatases (PTP), and serve as substrates of PTPs. This protein was found to participate in signal transduction mediated by various growth factor receptors. CD47 has been demonstrated to be a ligand for this receptor protein.

## **Basic Information**

#### **Description**

Recombinant Human SIRP-alpha/CD172a Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Glu31-Arg370) of human SIRP alpha/CD172a (Accession  $\#NP_542970.1$ ) fused with an Fc, 6×His tag at the C-terminus.

#### **Bio-Activity**

1.Measured by its binding ability in a functional ELISA. Immobilized Recombinant Human CD47 at 1  $\mu$ g/mL (100  $\mu$ L/well) can bind Recombinant Human SIRP alpha with a linear range of 1-6 ng/mL.|2.Loaded Human SIRP-alpha/CD172a Protein, C-hFc&His(Catalog: RP00171) on ProA Biosensor, can bind Human CD47 Protein, C-His Tag (Catalog: RP01306) with an affinity constant of 11.1 nM as determined in BLI assay (Gator).|3.Measured by the ability of the immobilized protein to support the adhesion of the OVCAR-3 cells. The ED $_{50}$  for this effect is 0.53-2.12  $\mu$ g/mL.

#### Shipping

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

#### Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

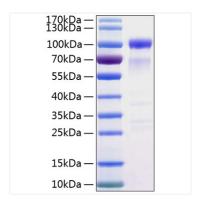

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

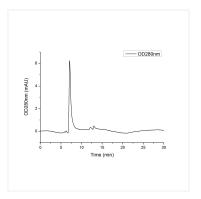

## **Operational Notes**

For your safety and health, please wear a lab coat and disposable gloves for handling.

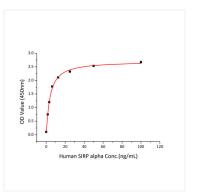

# **Validation Data**

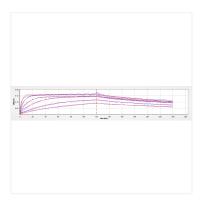

Recombinant Human SIRP-alpha/CD172a Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.

The purity of Human SIRP alpha/CD172a Protein (Cat.RP00171) was greater than 90% as determined by SEC-HPLC.

Immobilized Recombinant Human CD47 at 1  $\mu$ g/mL (100  $\mu$ L/well) can bind Recombinant Human SIRP alpha with a linear range of 1-6 ng/mL.

Loaded Human SIRP-alpha/CD172a Protein, C-hFc&His(Catalog: RP00171) on ProA Biosensor, can bind Human CD47 Protein, C-His Tag (Catalog: RP01306) with an affinity constant of 11.1 nM as determined in BLI assay (Gator).
