Recombinant Human IGFBP-4 Protein

ABclonal www.abclonal.com

Catalog No.: RP00185 Recombinant

Sequence Information

Species Gene ID Swiss Prot Human 3487 P22692

Tags

C-His

Synonyms

IGFBP4;BP-4;HT29-IGFBP;IBP4;IGFBP-4

Product Information

Source Purification HEK293 cells ≥ 90 % as

determined by SDS-

PAGE.

Calculated MW Observed MW

28.77 kDa 35 kDa

Endotoxin

< 0.1 EU/ μg of the protein by LAL method.

Formulation

Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.Contact us for customized product form or formulation.

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

IGFBP-4 (insulin-like growth factor binding protein 4) is member of the IGFBP family of structurally similar secreted glycoproteins . IGFBP-4 binds both insulin-like growth factor 1 (IGF-1) and IGF-2 with high affinity and inhibits IGF action in vitro. It circulates in the plasma in both glycosylated and non-glycosylated forms. Binding of this protein prolongs the half-life of the IGFs and alters their interaction with cell surface receptors. There is mounting evidence that IGFBP proteins plays a key role in the regulation of IGF bioavailability, by modulating its molecular size, capillary membrane permeability, target tissue specificity, cell membrane adherence and IGF affinity.

Basic Information

Description

Recombinant Human IGFBP-4 Protein is produced by HEK293 expression system. The target protein is expressed with sequence (Met1-Glu258) of human IGFBP-4 (Accession $\#NP_001543.2$) fused with a $6\times His$ tag at the C-terminus.

Bio-Activity

1.Measured by its binding ability in a functional ELISA. Immobilized Human IGFBP4 at 1 $\mu g/mL$ (100 $\mu L/well)$ can bind Human IGF1 with a linear range of 1.95-111.32 ng/mL.|2.Measured by its binding ability in a functional ELISA. Immobilized Human IGFBP4 Protein at 1 $\mu g/mL$ (100 $\mu L/well$) can bind IGF1 with a linear range of 1.95-122.3ng/mL.

Shipping

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

Validation Data

Recombinant Human IGFBP-4 Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.

Immobilized Human IGFBP4 at 1 $\mu g/mL$ (100 $\mu L/well) can bind Human IGF1 with a linear range of 1.95-111.32 ng/mL.$

Immobilized Human IGFBP4 Protein at 1 μ g/mL (100 μ L/well) can bind IGF1 with a linear range of 1.95-122.3ng/mL.
