Recombinant

Background

Species	Gene ID	Swiss Prot
Human	8792	O9Y6O6

C-His

Synonyms
TNFRSF11A;CD265;FEO;LOH18CR1;ODFR
;OFE;OPTB7;OSTS;PDB2;RANK;TRANCER

This protein is a member of the TNF-receptor superfamily. This receptors can interact with various TRAF family proteins, through which this receptor induces the activation of NF-kappa B and MAPK8/JNK. This receptor and its ligand are important regulators of the interaction between T cells and dendritic cells. This receptor is also an essential mediator for osteoclast and lymph node development. Mutations at this locus have been associated with familial expansile osteolysis, autosomal recessive osteopetrosis, and Paget disease of bone. Alternatively spliced transcript variants have been described for this locus.

Description

Recombinant Human TNFRSF11A/RANK/CD265 Protein is produced by Human Cell expression system. The target protein is expressed with sequence (Ile30-Pro212) of human TNFRSF11A/RANK/CD265 (Accession #Q9Y6Q6) fused with a 6xHis tag at the C-terminus.

Bio-Activity

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.
After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
Avoid repeated freeze/thaw cycles.

Source	Purification
HEK293 cells	≥ 95 % as determined by SDS-PAGE

Calculated MW	Observed MW
26.3 kDa	35-50 kDa

Endotoxin

< 1 EU/μg of the protein by LAL method.

Formulation

Lyophilized from a 0.2 μm filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

Reconstitution

Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Validation Data

Recombinant Human
TNFRSF11A/RANK/CD265 Protein was
determined by SDS-PAGE under reducing
conditions with Coomassie Blue.
