

Recombinant Human NKG2-2A/KLRC1/CD159a Protein

Catalog No.: RP00571 Recombinant

Sequence Information

Species Gene ID Swiss Prot Human 3821 P26715

Tags N-His

Synonyms

KLRC1;CD159A;NKG2;NKG2A

Product Information

Source Purification HEK293 cells ≥ 95 % as

determined by SDS-

PAGE.

Calculated MW Observed MW

16.5 kDa 25-40 kDa

Endotoxin

< 1 EU/µg of the protein by LAL method.

Formulation

Lyophilized from a 0.2 µm filtered solution of PBS, pH7.4.Contact us for customized product form or formulation.

Reconstitution

Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

NKG2-A/NKG2-B Type II Integral Membrane Protein contains 1 C-type lectin domain and belongs to the killercell lectin-like receptor family. The killer cell lectin-like receptor family is a group of transmembrane proteinspreferentially expressed in NK cells. Members of this proteins is characterized by the type II membraneorientation and the presence of a C-type lectin domain. NKG2 is expressed only in NK-cells, but not in T-cells orB-cells. It has been shown that NKG2 represents a family of related cDNA clones, designated NKG2A, NKG2B,NKG2C, and NKG2D, which encode type 2 integral membrane proteins (extracellular C-terminus) containing aC-type lectin domain. NKG2 plays a role as a receptor for the recognition of MHC class I HLA-E molecules by NKcells and some cytotoxic T-cells. NKG2A and NKG2B have been given the designation CD159a in thenomenclature of CD antigens.

Basic Information

Description

Recombinant Human NKG2-2A/KLRC1/CD159a Protein is produced by Human cells expression system. The target protein is expressed with sequence (Arg100-Leu233) of human NKG2-A/NKG2-B Type II Integral Membrane Protein (Accession #P26715) fused with an 8×His tag at the N-terminus.

Bio-Activity

Shipping

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

Validation Data

Recombinant Human NKG2-2A/KLRC1/CD159a Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
