

Recombinant Human Alkaline phosphatase (Intestinal type)/ALPI Protein

Catalog No.: RP00679 Recombinant

Sequence Information

SpeciesGene IDSwiss ProtHuman248P09923

Tags C-6His

Synonyms

ALPI; Intestinal-type alkaline phosphatase; IAP; Intestinal alkaline phosphatase; EC:3.1.3.1

Product Information

Source Purification

HEK293 cells ≥ 90 % as determined by SDS-

PAGE.

Calculated MW Observed MW

53.15 kDa 60-75 kDa

Endotoxin

 $< 0.1 \; \text{EU/}\mu\text{g}$ of the protein by LAL method.

Formulation

Lyophilized from a 0.2 μ m filtered solution of PBS, pH 7.4.

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

Recombinant Human Alkaline phosphatase (Intestinal type)/ALPI Protein encodes for intestinal phosphatase alkaline, a brush border metalloenzyme that hydrolyses phosphate from the lipid A moiety of lipopolysaccharides and thereby drastically reduces Toll-like receptor 4 agonist activity. ALPI mutations impaired either stability or catalytic activity of ALPI and rendered it unable to detoxify lipopolysaccharide-dependent signalling. ALPI mutations should be included in screening for monogenic causes of inflammatory bowel diseases and lay the groundwork for ALPI-based treatments in intestinal inflammatory disorders.

Basic Information

Description

Recombinant Human Alkaline phosphatase (Intestinal type)/ALPI Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Val20-Thr502) of Human Alkaline phosphatase (Intestinal type)/ALPI (Accession #NP 001622.2) fused with His tag at the C-terminus.

Bio-Activity

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human Alkaline phosphatase (Intestinal type)/ALPI Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
