| Human | 10225 | P40200-2 |

C-His

TACTILE:CD96

| | |
|---------------|----------------------------------|
| Source | Purification |
| HEK293 cells | ≥ 95 % as determined by SDS-PAGE |

29.97 kDa 90-140 kDa

< 1 EU/μg of the protein by LAL method.

Lyophilized from a 0.2 μm filtered solution of PBS, pH7.4. Contact us for customized product form or formulation.

Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Basic Information

Recombinant Human TACTILE/CD96 Protein is produced by Human cells expression system. The target protein is expressed with sequence (Val22-Met503) of human CD96 (Accession #P40200-2) fused with a 6xHis tag at the C-terminus.

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.
After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human TACTILE/CD96 Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
