

Recombinant Mouse MMP-9 Protein

Catalog No.: RP01224 **Recombinant**

Sequence Information

Species	Gene ID	Swiss Prot
Mouse	17395	P41245

Tags

C-His

Synonyms

92 kDa gelatinase;92 kDa type IV collagenase;GELB;MMP9;MMP-9;CLG4B;MMP9

Product Information

Source	Purification
HEK293 cells	≥ 95 % as determined by SDS-PAGE.

Calculated MW	Observed MW
79.39 kDa	100 kDa

Endotoxin

< 0.1 EU/μg of the protein by LAL method.

Formulation

Lyophilized from a 0.22 μm filtered solution of 50mM Tris,10mM CaCl₂,150mM NaCl, pH 7.5Contact us for customized product form or formulation.

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

Basic Information

Description

Recombinant Mouse MMP-9 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Ala20-Pro730) of mouse MMP-9 (Accession #NP_038627.1.) fused with a 6×His tag at the C-terminus.

Bio-Activity

Measured by its ability to cleave the fluorogenic peptide substrate Mca-PLGL-Dpa-AR-NH₂. The specific activity is >1900 pmol/min/μg.

Shipping

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

Storage

Store at -20°C.Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

Validation Data

Recombinant Mouse MMP-9 Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
