Recombinant Human IL-21 Protein

ABclonal

www.abclonal.com

Catalog No.: RP01312 Recombinant

Sequence Information

Species Gene ID Swiss Prot Human 59067 Q9HBE4-1

Tags

C-His

Synonyms

IL21;CVID11;IL-21;Za11

Product Information

Source Purification HEK293 cells ≥ 95 % as

determined by SDS-PAGE.

Calculated MW Observed MW

16.12 kDa 18 kDa

Endotoxin

< 1 EU/µg of the protein by LAL method.

Formulation

Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

IL21 belongs to the IL-15/IL-21 family. It is a cytokine with immunoregulatory activity. Cytokines are proteinaceous signaling compounds that are major mediators of the immune response. They control many different cellular functions including proliferation, differentiation, and cell survival/apoptosis but are also involved in several pathophysiological processes including viral infections and autoimmune diseases. Cytokines are synthesized under various stimuli by a variety of cells of both the innate (monocytes, macrophages, dendritic cells) and adaptive (T- and B-cells) immune systems. IL21 is expressed in activated CD4-positive T-cells but not in CD8-positive T-cells, B-cells, or monocytes. It may promote the transition between innate and adaptive immunity. IL-21 has been tried as a therapy for alleviating allergic responses. It can significantly decrease pro-inflammatory cytokines produced by T cells in addition to decreasing IgE levels in a mouse model for rhinitis (nasal passage inflammation).

Basic Information

Description

Recombinant Human IL-21 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Gln25-Ser155) of human IL-21 (Accession #NP_068575.1) fused with an $6\times$ His tag at the C-terminus.

Bio-Activity

1.Measured by its binding ability in a functional ELISA. Immobilized Human IL21R at 2 μ g/mL (100 μ L/well) can bind Human IL21 with a linear range of 0.078-0.973 μ g/mL.|2.Measured by its ability to induce Interferon gamma secretion by human natural killer lymphoma NK-92 cells. The ED₅₀ for this effect is 1.52-6.06 ng/mL, corresponding to a specific activity of $1.65\times10^5\sim6.58\times10^5$ units/mg.

Shipping

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

After reconstitution, the protein solution is stable at -20 $^{\circ}$ C for 3 months, at 2-8 $^{\circ}$ C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

Validation Data

Recombinant Human IL-21 Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.

Immobilized Human IL21R at 2 μ g/mL (100 μ L/well) can bind Human IL21 with a linear range of 0.078-0.973 μ g/mL.

Recombinant Human IL-21 induce Interferon gamma secretion by human natural killer lymphoma NK-92 cells. The ED $_{50}$ for this effect is 1.52-6.06 ng/mL, corresponding to a specific activity of $1.65\times10^5\sim6.58\times10^5$ units/mg.
