

Catalog No.: RP01617 **Recombinant**

Species	Gene ID	Swiss Prot
Mouse	50929	O9J1Y9

Tags
C-hFC

Synonyms
Interleukin-22; IL-22; Cytokine Zcyto18;
IL-T1F; IL-D110; T1Fa; T1FIL-23;
ZCYTO18; IL22

Source HEK293 cells	Purification ≥ 95 % as determined by SDS- PAGE
-------------------------------	--

Calculated MW	Observed MW
42.60 kDa	60-68 kDa

< 0.1 EU/μg of the protein by LAL method.

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4.

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

The cytokine interleukin-22 (IL-22) is a critical regulator of epithelial homeostasis. It has been implicated in multiple aspects of epithelial barrier function, including regulation of epithelial cell growth and permeability, production of mucus and antimicrobial proteins (AMPs), and complement production.

Recombinant Mouse IL-22 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Leu34-Val179) of mouse IL-22 (Accession #NP_058667.1) fused with and a hFc tag at the C-terminus.

Measured by its ability to induce IL-10 secretion in COLO 205 human colorectal adenocarcinoma cells. The ED₅₀ for this effect is 150-600 ng/mL.

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.
After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Mouse IL-22 Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.

Recombinant Mouse IL-22 induce IL-10 secretion in COLO 205 human colorectal adenocarcinoma cells. The ED₅₀ for this effect is 150-600 ng/mL.
