

Catalog No.: RP01728 **Recombinant**

Species	Gene ID	Swiss Prot
Human	796	P01258-1

C-6His

CT; KC; PCT; CGRP; CALC1; CGRP1;
CGRP-I; CGRP-alpha;CALCA

Source	Purification
HEK293 cells	≥ 90 % as determined by SDS-PAGE

13.64 kDa 14-20 kDa

< 1 EU/μg of the protein by LAL method.

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4.

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize freeze-thaw cycles.

This protein is a member of the neurotrophic tyrosine kinase receptor (NTRK) family. This kinase is a membrane-bound receptor that, upon neurotrophin binding, phosphorylates itself and members of the MAPK pathway. The presence of this kinase leads to cell differentiation and may play a role in specifying sensory neuron subtypes. Mutations in this gene have been associated with congenital insensitivity to pain, anhidrosis, self-mutilating behavior, mental retardation and cancer. Alternate transcriptional splice variants of this gene have been found, but only three have been characterized to date.

Recombinant Human Calcitonin/CALCA Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Ala26-Asn141) of human Calcitonin/CALCA (Accession #NP_001029124.1) fused with and a 6xHis tag at the C-terminus.

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human Calcitonin/CALCA Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
