Recombinant Human CD81 Protein

ABclonal

www.abclonal.com

Catalog No.: RP01871 Recombinant

Sequence Information

Species Gene ID Swiss Prot Human 975 P60033

Tags

N-hFc

Synonyms

CD81 antigen; 26 kDa cell surface protein TAPA-1; Target of the antiproliferative antibody 1;

Tetraspanin-28; Tspan-28; CD81□CD81;

TAPA1; TSPAN28

Product Information

Source Purification

HEK293 cells ≥ 90% as determined by SDS-

PAGF.

Calculated MW Observed MW

35.73 kDa 35-45 kDa

Endotoxin

 $< 0.1 \; \text{EU/}\mu\text{g}$ of the protein by LAL method.

Formulation

Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

CD81, belongs to the transmembrane 4 superfamily, also known as the tetraspanin family. Members of this family mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. It is related to adhesion, morphology, activation, proliferation, and differentiation of B, T, and other cells. On B cells CD81 is part of a complex with CD21, CD19, and Leu13. This complex reduces the threshold for B cell activation via the B cell receptor by bridging Ag specific recognition and CD21-mediated complement recognition.

Basic Information

Description

Recombinant Human CD81 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Phe113-Lys201) of Human CD81 (Accession $\#NP_004347.1$) fused with hFc tag at the N-terminus.

Bio-Activity

Shipping

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

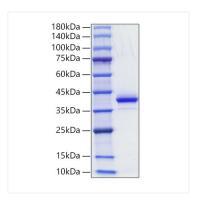

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

Validation Data

Recombinant Human CD81 Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
