

Catalog No.: RP01987 **Recombinant**

Species	Gene ID	Swiss Prot
Human	1380	P20023

Tags
C-Avi&6His

CR2; C3DR Complement receptor type 2; Cr2; Complement C3d receptor; Epstein-Barr virus receptor; EBV receptor; CD21

Source	Purification
HEK293 cells	≥ 90 % as determined by SDS-PAGE

Calculated MW	Observed MW
106.85 kDa	140-150 kDa

< 1 EU/μg of the protein by LAL method.

Lyophilized from a 0.2 μ m filtered solution of PBS, pH 7.4.

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

CD21, also known as Complement component (3d / Epstein Barr virus) receptor 2 and CR2, is a member of the CD system and is a protein involved in complement system. CD21 is present on all mature B-cells and some T-cells and follicular dendritic cells. CD21 on mature B-cells form a complex called the B cell receptor complex with two other membrane proteins, CD19 and CD81. CD21 has a function in the complement system through serving as the cellular receptor specific for ligands such as C3 and C4 which can be attached to foreign macromolecules in order to remove or uptake them. This results in B-cells having enhanced response to the antigen.

Recombinant Human CR2/CD21 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Ile21-Arg971) of Human CR2/CD21 (Accession #NP_001868.2) fused with Avi and His tag at the C-terminus.

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

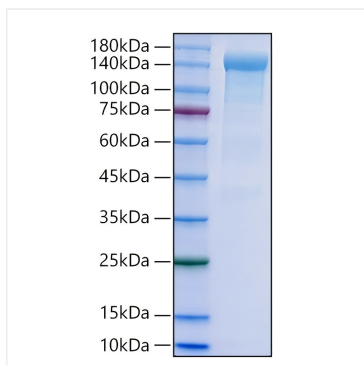

For your safety and health, please wear a lab coat and disposable gloves for handling.

Validation Data

Recombinant Human CR2/CD21 Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
