Recombinant Human TMPO Protein

ABclonal www.abclonal.com

Catalog No.: RP02141 Recombinant

Sequence Information

Species Gene ID Swiss Prot Human 7112 P42166

Tags

C-His

Synonyms

TMPO; CMD1T; LAP2; LEMD4; PRO0868; TP·

thymopoietin;CMD1T;LAP2;LEMD4;PRO0 868;TP

Product Information

SourcePurificationE. coli≥ 95 % as

determined by SDS-PAGE.

Calculated MW Observed MW

21.6 kDa 27 kDa

Endotoxin

< 1 EU/µg of the protein by LAL method.

Formulation

Lyophilized from a 0.2 µm filtered solution of 20mM PB, 150mM NaCl, pH 7.4.Contact us for customized product form or formulation.

Reconstitution

Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

Thymopentin is a member of the LEM family. Thymopentin is expressed in many tissues, highly in the adult thymus and fetal liver. The N-terminal contains two structurally independent domains, LEM domain and LEM-like domain. The C-terminal domain forms a four-stranded coiled coil. Thymopentin may be involved in the structural organization of the nucleus and in the post-mitotic nuclear assembly. It is associated with T-cell development and function. Meantime, Thymopentin plays an important role, together with LMNA, in the nuclear anchorage of RB1. Thymopoietin is participated in the induction of CD90 in the thymus.

Basic Information

Description

Recombinant Human TMPO Protein is produced by E.coli expression system. The target protein is expressed with sequence (Pro2-Glu187) of human TMPO (Accession #P42167) fused with a 6xHis tag at the C- terminus.

Bio-Activity

Shipping

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

^{*} DODODODODODODODO

Validation Data

Recombinant Human TMPO Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
