Biotinylated Recombinant Human TNFSF13B/BAFF/CD257 Trimer Protein

Catalog No.: RP02281 Recombinant

Sequence Information

Background

SpeciesGene IDHuman10673

Swiss Prot 09Y275

Tags

N-His&Avi

Synonyms

TNFSF13B;BAFF;BLYS;CD257;DTL;TALL-1 ;TALL1;THANK;TNFSF20;TNLG7A;ZTNF4

Product Information

Source HEK293 cells

Purification > 95% by Tris-Bis PAGE;> 95% by SEC-HPLC

Endotoxin

< 1 EU/ μ g of the protein by LAL method.

Formulation

Lyophilized from a 0.22 μ m filtered solution of PBS, pH 7.4.

Reconstitution

Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid votex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Basic Information

Description

Biotinylated Recombinant Human BAFF trimer Protein is produced by Expi293 expression system. The target protein is expressed with sequence (Thr141-Leu285 Trimer) of Human BAFF trimer fused with a His and Avi tag at the N-terminal.

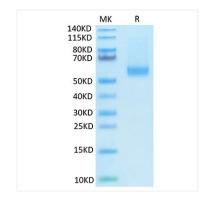

Bio-Activity

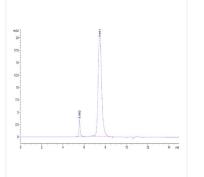

Immobilized Biotinylated Human BAFF,His Tag at 1 µg/mL (100 µL/Well). Dose response curve for Human BAFFR,hFc Tag with the EC₅₀ of 0.80 µg/mL determined by ELISA.

Storage

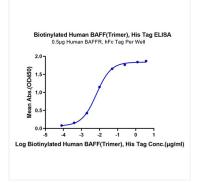

Store the lyophilized protein at -20°C to -80°C for long term. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

Biotinylated Human BAFF (Trimer) on Tris-Bis PAGE under reduced condition. The purity is greater than 95%. The purity of Biotinylated Human BAFF (Trimer) is greater than 95% as determined by SEC-HPLC.

Immobilized Human BAFFR, hFc Tag at 5 μ g/ml (100 μ l/Well) on the plate. Dose response curve for Biotinylated Human BAFF (Trimer) , His Tag with the EC_{so} of 6.9ng/ml determined by ELISA.
