

Catalog No.: RP02494 **Recombinant**

Species	Gene ID	Swiss Prot
Human	27181	O9NYZ4

C-His

Siglec-8;SAF2; SIGLEC-8;
SIGLEC8L;SIGLEC8;SIGLEC-8;SIGLEC8L

Source	Purification
HEK293 cells	≥ 95 % as determined by SDS-PAGE

38.53 kDa 45-60 kDa

< 0.01 EU/μg of the protein by LAL method

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4.

Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Recombinant Human Siglec-8 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Met17-Ala363) of Human siglec 8 fused with a His tag tag at the C-terminal.

Lyophilized proteins are shipped at ambient temperature.
Liquid proteins are shipped at frozen temperature with dry ice.
Upon receipt, store it immediately at the temperature recommended below.

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.
After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
Avoid repeated freeze/thaw cycles.

For your safety and health, please wear a lab coat and disposable gloves for handling.

Validation Data

Recombinant Human Siglec-8 Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
