Recombinant Human EphA1/EPH Kinase

ABclonal www.abclonal.com

Catalog No.: RP03386LQ Recombinant

Sequence Information

Species Gene ID Swiss Prot Human 2041 P21709

Tags

N-His-GST

Synonyms

EPHA1; EPH; EPHT; EPHT1; hEpha1; Ephrin type-A receptor 1

Product Information

Source Purification

Baculovirus-Insect ≥ 85% as

Cells determined by SDSPAGE;≥ 85% as
determined by
HPLC.

Calculated MW Observed MW

74.7 kDa 60-70 kDa

Endotoxin

< 1 EU/µg of the protein by LAL method.

Formulation

Supplied as a 0.22 μ m filtered solution in 50 mM Tris-HCl, 150 mM NaCl, 5% glycerol, 1 mM DTT. (pH 7.5). Contact us for customized product form or formulation.

Reconstitution

Please use running water to thaw it quickly.

Background

EPH receptor A1 (ephrin type-A receptor 1) is a protein that in humans is encoded by the EPHA1 gene. This gene belongs to the ephrin receptor subfamily of the protein-tyrosine kinase family. EPH and EPH-related receptors have been implicated in mediating developmental events, particularly in the nervous system. Receptors in the EPH subfamily typically have a single kinase domain and an extracellular region containing a Cys-rich domain and 2 fibronectin type III repeats. The ephrin receptors are divided into 2 groups based on the similarity of their extracellular domain sequences and their affinities for binding ephrin-A and ephrin-B ligands. This gene is expressed in some human cancer cell lines and has been implicated in carcinogenesis.

Basic Information

Description

Recombinant Human EphA1/EPH Kinase is produced by Baculovirus-Insect Cells expression system. The target protein is expressed with sequence (Phe568-Asp976) of Human EPHA1 (Accession #P21709) fused with a N-His-GST tag.

Bio-Activity

The activity of EPHA1 is based on the MSA technology, and the content and ratio of the substrate and the product are directly separated and detected in real time and dynamically by the different migration rates of the substrate and the product after the enzymatic reaction.

Shipping

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

Storage

Store at -70° C. This product is stable at $\leq -70^{\circ}$ C for up to 1 year from the date of receipt. For optimal storage, aliquot into smaller quantities after centrifugation and store at recommended temperature.

Aliquots below 10 μL are not advisable. Product must not be stored in diluted solutions. Avoid repeated freeze-thaw cycles.

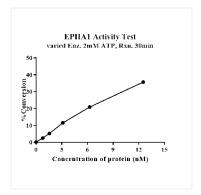

Avoid repeated freeze/thaw cycles.

Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

Recombinant Human EphA1/EPH Kinase was resolved with SDS-PAGE under reducing (Lane 1) conditions.

The activity of EPHA1 is based on the MSA technology, and the content and ratio of the substrate and the product are directly separated and detected in real time and dynamically by the different migration rates of the substrate and the product after the enzymatic reaction.
