

Recombinant Human CK1-alpha/CSNK1A1 Kinase

Catalog No.: RP03402LQ Recombinant

Sequence Information

Species Gene ID Swiss Prot Human 1452 P48729

Tags

N-His-GST&C-Strep II

Synonyms

CSNK1A1; CK1α; CK1; CKI-alpha; CK1 alpha; Casein kinase I isoform alpha

Product Information

Source Purification

Baculovirus-Insect ≥ 85% as

Cells determined by SDSPAGE;≥ 85% as
determined by
HPLC.

Calculated MW Observed MW

67.6 kDa 55-70 kDa

Endotoxin

< 1 EU/µg of the protein by LAL method.

Formulation

Supplied as a 0.22 µm filtered solution in 50 mM Tris-HCl, 200 mM NaCl, 20% glycerol, 5 mM DTT, 0.1 M Trehalose. (pH 7.5). Contact us for customized product form or formulation.

Reconstitution

Please use running water to thaw it quickly.

Background

Casein kinase I isoform alpha is an enzyme that in humans is encoded by the CSNK1A1 gene. The Casein kinase 1 family of protein kinases are serine/threonine-selective enzymes that function as regulators of signal transduction pathways in most eukaryotic cell types. CK1 isoforms are involved in Wnt signaling, circadian rhythms, nucleo-cytoplasmic shuttling of transcription factors, DNA repair, and DNA transcription. Casein kinase 1, alpha 1 has been shown to interact with Centaurin, alpha 1 and AXIN1.

Basic Information

Description

Recombinant Human CK1-alpha/CSNK1A1 Kinase is produced by Baculovirus-Insect Cells expression system. The target protein is expressed with sequence (Ala2-Phe337) of Human CSNK1A1 (Accession #P48729) fused with a N-His-GST&C-Strep II tag.

Bio-Activity

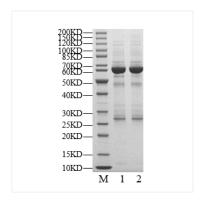

The activity of CSNK1A1 is based on the MSA technology, and the content and ratio of the substrate and the product are directly separated and detected in real time and dynamically by the different migration rates of the substrate and the product after the enzymatic reaction.

Storage

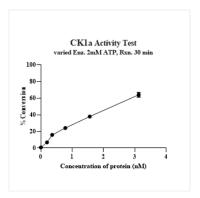

Store at -70°C. This product is stable at \leq -70°C for up to 1 year from the date of receipt. For optimal storage, aliquot into smaller quantities after centrifugation and store at recommended temperature.

Aliquots below 10 μL are not advisable. Product must not be stored in diluted solutions. Avoid repeated freeze-thaw cycles.

Avoid repeated freeze/thaw cycles.

Recombinant Human CK1-alpha/CSNK1A1 Kinase was resolved with SDS-PAGE under reducing (Lane 1) and non-reducing (Lane 2) conditions.

The activity of CSNK1A1 is based on the MSA technology, and the content and ratio of the substrate and the product are directly separated and detected in real time and dynamically by the different migration rates of the substrate and the product after the enzymatic reaction.
